

nanoSMOOTHING™ SYSTEM

[*for stronger, healthier, beautiful, manageable hair*]

Experience the benefits of Nano Technology with the Huetiful nanoSMOOTHING™ System

What is the Huetiful nanoSMOOTHING™ System?

The Huetiful nanoSMOOTHING™ System is designed to silken, elongate and smooth wavy, curly, natural or processed hair. The result is stronger, healthier, beautifully manageable hair that can be worn straight or in its natural wavy or curly state.

The Huetiful nanoSMOOTHING™ System transforms the hair without the use of harsh, permanent chemicals and without permanent alteration to the hair's bond structure; so hair is silky smooth, perfectly curled and unimaginably frizz free. You get the flexibility of natural hair to be worn straight with resistance to swelling from humidity or worn naturally curly with maximum curl definition and length.

Is the Huetiful Smoothing System a chemical?

No, the Huetiful nanoSMOOTHING™ System is not a chemical. It is neither a relaxer nor keratin system. The Smoothing System does not use any harsh or permanent chemicals and does not break the disulfide bonds like a relaxer. Unlike many keratin systems, the Huetiful nanoSMOOTHING™ System is certified Formaldehyde Free. Because the molecules are smaller than a keratin molecule, the Huetiful nanoSMOOTHING™ System does not rely on harsh chemicals to facilitate the penetration of the smoothing treatment.

How does the Huetiful nanoSMOOTHING™ System work?

The Huetiful nanoSMOOTHING™ System's amino acid based formula temporary elongates the bonds of the hair. When proper heat is applied it creates a reaction that infuses essential hair proteins inside the hair and rebuilds the hair from the inside out.

[12]

The duration, in weeks, of a treatment. When the complete system is used, it will last for up to 12 weeks.

[90]

The average length of time, in minutes, it takes for a trained stylist to do the entire treatment on wavy or curly hair that is approximately bra strap length.

[4 – 6]

The number of applications most stylist get from on 8oz bottle of Huetiful nanoSMOOTHING™ Treatment.

[yes]

Semi, Demi or Permanent Color can be used before or after the use of the Huetiful nanoSMOOTHING™ System. You should apply color at least one week prior to receiving the Huetiful nanoSMOOTHING™ System or at least two weeks after receiving the treatment.

STEPS TO SMOOTHER LUXURIOUS HAIR

[in just 90 minutes]

1 CLEANSE THE HAIR.

Remove all product build up from the hair cuticle with the Huetiful Clarifying Shampoo.

2 APPLY THE TREATMENT.

Take ½ inch partings and apply 2–3 pumps of the Huetiful nanoSMOOTHING Treatment at the root of each ½ inch section and comb through to the ends. Let treatment process for 20 minutes under a plastic cap.

BEFORE

AFTER

3 SPRAY IN LEAVE-IN PROTECTANT & BLOW DRY.

Thoroughly spray in the leave-in conditioning protectant that helps protect and smoothen the cuticle once heat activated. Taking medium subsections, starting at the back, blow dry hair from root to ends until completely dry.

4 FLAT IRON.

Flat iron hair at 380°–400°. doing 1-2 passes from root to ends. You do not need high heat once the treatment has been blow-dried. The system is designed to restructure the bonds within the hair shaft; allowing for lower heat to sufficiently straighten the hair. Style as desired
